What say you to this? Graffiti and dead vegetation could legitimately be an issue

From Planning:

"There are two trash enclosures and instead of having blank walls that will be targets for graffiti planner has asked they screen the wall. They can be climbing vines that aren't water intensive. In response to climbing vines, there are footings that would not allow vines, according to applicant. The trash enclosures on not just on an alley but a public right of way. There still just needs to be a creative solution."

You are so awesome. Why must we nag for common sense responses to good intentioned questions? I see the lobster truck in your future at the Halloween Town Fair....you are attending I hope.

FYI- I have relentlessly been asking for the exemption re: trash enclosure and think I have everyone convinced. Keep fingers crossed

Dear Nate and Mark,

I was curious...is the Council Office going to be able to do anything to help the CDO see the spirit of the law?

I think we're at the point where we need to spearhead some CDO reform in order to keep our owners from buying in El Segundo next time.

Keep me updated...please.
